**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, 30-44, and 55-59, drawn to a gaming machine having a master gaming controller designed to control one or more games played on a gaming machine and to request preference account information from a remote server, classified in class 463, subclass 42.
  - II. Claims 16-30, and 45-54, drawn to a preference account server, classified in class 705, subclass 26. The inventions are distinct, each from the other because of the following reasons:
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a preference account server for a shopper having an online account with an online retail store. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Any inquiry concerning this communication or earlier communications from the examiner
